

TESNIT BA-Auto

TECHNICAL DATA SHEET

Basis

Aramide fibres, SBR

General properties and application

Gasket material with controlled swell properties in oil, made of special material for sealing with low surface stress. Has a wide range of applications in automotive and chemical industry.

Dimensions of standard sheets

Sheet size: 1000 x 1500 mm, 1500 x 1500 mm

Thickness: 0.5 mm, 0.8 mm, 1.0 mm, 1.5 mm, 2.0 mm, 3.0 mm (other thicknesses on request)

Tolerances: Thickness: < 1 mm ± 0.1 mm, ≥ 1 mm ± 10 %, Length: ± 50 mm, Width: ± 50

Surface treatment: Treatment with graphite, PTFE and antistick coating is available on request.

Technical data

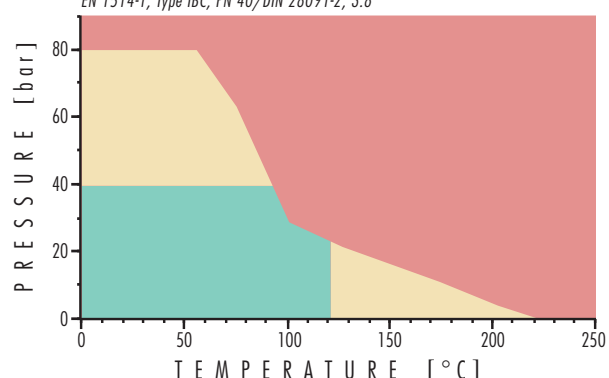

Typical values (thickness 2.0 mm)		
Compressibility	ASTM F 36/J	9 %
Recovery	ASTM F 36/J	50 %
Tensile strenght	DIN 52910	10 MPa
Stress resistance	DIN 52913	
• 16h, 300°C, 50 MPa		
• 16h, 175°C, 50 MPa		25 MPa
Specific Leak rate	DIN 3535/6	0.06 mg/(s.m)
Thickness increase	ASTM F 146	
• Oil IRM 903, 5h, 150°C		40 %
• ASTM Fuel B, 5h, 23°C		25 %
*Max. operating conditions		
Peak temperature		280°C / 536°F
Continuous temperature		220°C / 428°F
- with steam		
Pressure		80 bar / 1160 psi

* Temperature and pressure represent maximum values and should not be used simultaneously. They are given only for guidance, since they depend not only on the type of gasket material but also on the assembly conditions. Very important factors are: thickness of material, nature of service medium, type of flange, surface stress. Steam application requires special consideration.

- General suitability using common installation practices under the condition of chemical compatibility.
- Max. performance is ensure through appropriate measures for joint design and gasket installation. Consultation is recommended.
- Limited application area - Technical consultation is mandatory.

BA-Auto, 2 mm

TESNIT BA-Auto

The recommendations made here are intended to be a guideline for the selection of the suitable gasket quality. Because the function and durability of the products depend upon a number of factors, the data may not be used to support any warranty claims.

● Recommended	■ Recommendation depends on operating conditions	▼ Not recommended
Acetamide	●	
Acetic acid 10%	●	
Acetic acid 100%	●
